SEMESTRE: 3

DIAS: _____ HORÁRIO: _____

CANDIDATO: _____ DATA: ____/____/____

Answer the questions 01 to 05 according to the text below

The Rise of Artificial Intelligence in Everyday Life

Artificial Intelligence (AI) is no longer a technology of the future. It has become an important part of our daily lives, often without us even realizing it. From smartphones and online shopping to healthcare and education, AI is changing the way people work, communicate, and solve problems. As technology continues to improve, AI is becoming more powerful, more accessible, and more integrated into society.

One of the most common uses of AI is in virtual assistants such as Siri, Alexa, and Google Assistant. These programs can answer questions, set reminders, play music, and even control smart devices in our homes. AI is also used by streaming platforms like Netflix and Spotify to recommend movies, TV shows, and songs based on users' preferences. Social media platforms rely on AI to organize news feeds and suggest content that users are likely to enjoy.

In the field of healthcare, AI has made remarkable progress. Doctors use AI-powered systems to help detect diseases more quickly and accurately. Some computer programs can analyze thousands of medical images in just a few minutes, helping specialists identify signs of cancer or other illnesses that might be difficult to notice. Although AI cannot replace doctors, it serves as a valuable tool that supports medical professionals in making better decisions.

Education has also benefited from artificial intelligence. Many language-learning applications use AI to personalize lessons according to each student's strengths and weaknesses. Online learning platforms can track students' progress, identify areas where they need more practice, and recommend exercises that match their learning style. This personalized approach can make learning more effective and engaging.

However, the rapid development of AI has also raised important concerns. Many people worry that machines may replace human workers in certain professions, especially those involving repetitive tasks. Others are concerned about privacy, as AI systems often collect and analyze large amounts of personal data. There are also ethical questions about how AI should be used and who should be responsible when AI systems make mistakes.

Despite these challenges, experts believe that AI will continue to create new opportunities rather than simply replacing jobs. As technology evolves, many new careers will emerge, requiring people to develop different skills such as creativity, critical thinking,

communication, and digital literacy. Governments, schools, and companies are already investing in training programs to prepare workers for the changing job market.

In conclusion, artificial intelligence is transforming modern society in countless ways. It offers significant benefits in areas such as healthcare, education, business, and entertainment, while also presenting challenges that require careful regulation and responsible use. The future of AI will largely depend on how humans choose to develop, manage, and collaborate with this powerful technology.

01. What is the main idea of the text?

- A. Artificial Intelligence is only useful in hospitals.
- B. Artificial Intelligence is becoming an important part of everyday life and brings both benefits and challenges.
- C. Artificial Intelligence should completely replace human workers.
- D. Artificial Intelligence is only used by technology companies.

02. According to the text, how does AI help in healthcare?

- A. It replaces doctors in hospitals.
- B. It performs surgeries without human assistance.
- C. It helps doctors detect diseases more quickly and accurately.
- D. It eliminates the need for medical education.

03. What concern about AI is mentioned in the text?

- A. AI makes the internet slower.
- B. AI prevents people from studying.
- C. AI may replace some jobs and raise privacy concerns.
- D. AI only works in rich countries.

04. According to the author, what skills will become more important in the future?

- A. Memorizing large amounts of information.
- B. Creativity, critical thinking, communication, and digital literacy.
- C. Writing by hand and using paper dictionaries.
- D. Driving and operating heavy machinery only.

05. Which statement is TRUE according to the text?

- A. AI has no influence on education.
- B. AI is only used for entertainment.
- C. AI can personalize learning experiences for students.
- D. AI has stopped creating new jobs.

Questions 06 to 25 are about grammar and use of language.

06. Emma is on vacation in Italy. She sent this message to her friend:

"I'm at the Colosseum now. It is amazing! My parents _____ lots of pictures while I write this message."

- A. take
- B. took
- C. are taking
- D. have taken

07. Daniel arrives home and notices that his sister is wearing sports clothes and carrying a tennis racket. He asks:

- A. Do you play tennis now?
- B. Are you playing tennis now?
- C. Did you play tennis now?
- D. Will you play tennis now?

08. Lucas works from home, but every Saturday he volunteers at an animal shelter. During the week, he only goes there if someone asks for extra help.

Which sentence best describes his routine?

- A. Lucas always volunteers at the shelter.
- B. Lucas usually volunteers at the shelter.
- C. Lucas sometimes volunteers at the shelter.
- D. Lucas never volunteers at the shelter.

09. Read the sentence.

"My grandfather still exercises every morning before breakfast."

Which sentence has the same meaning?

- A. My grandfather is always exercising every morning.
- B. My grandfather always exercises before breakfast.
- C. My grandfather exercises always before breakfast.
- D. Always my grandfather exercises before breakfast.

10. Maria has been practicing the violin since she was six years old. Last month, she won an international music competition.

Which sentence best describes her ability?

- A. Maria can't play the violin well.
- B. Maria can play the violin extremely well.
- C. Maria isn't playing the violin well.
- D. Maria doesn't can play the violin.

11. The weather forecast says there is a 90% chance of heavy rain this afternoon.

Which sentence is the most appropriate?

- A. It can't rain this afternoon.
- B. It can rain this afternoon.
- C. It is raining this afternoon.
- D. It rains this afternoon.

12. Kevin has already bought his plane ticket, reserved a hotel, and packed his suitcase for Japan.

What can we conclude?

- A. Kevin travels to Japan.
- B. Kevin is going to travel to Japan.
- C. Kevin traveled to Japan.
- D. Kevin has traveled to Japan.
